Abstract Measurement results of a Class AB/B design
for the 380-460MHz band with the BLP9LA25S

1. Revision History

Table 1: Report revisions

| Revision | Date | Description | Author |
|----------|----------|-----------------------|--------------|
| 1.0 | 20190327 | Initial document | Tom Brinkman |
| 2.0 | 20190410 | Final | Tom Brinkman |

5. General description

This report presents the measurement results of the Class AB/B demo AR191042. The device used is a 25W, 9th generation LDMOS, the BLP9LA25S. The presented demo is tuned for the frequency 380-460MHz.

Figure 1 Demo Front view

6. Biasing

The efficiencies presented are based on the currents of the drain feeds only. I.e. the biasing currents for the gate circuitry has not been included.

Unless otherwise stated, the biasing is as follows:

$$V_{DD} = 13.6V$$

$$V_{GS} = 1.8V, \text{ leading to an } I_{DQ} = 42mA$$

7. Performance Indication 380-460MHz

Table 2: Performance indication, sampled at 380-460MHz

| Parameter | Condition | Unit | CW |
|------------------------|--------------------|------|-----------|
| V_{DD} | | V | 13.6 |
| S11 at connector | | dB | -7.3 |
| P_{1dB}^1 | $G_{MAX}-1dB$ | W | 27 |
| P_{2dB}^1 | $G_{MAX}-2dB$ | W | 31 |
| P_{OUT} of operation | P_o^2 | W | 31 |
| Gain | @ P_o | dB | >15.7 |
| Drain Efficiency | @ P_o | % | >48 |
| Drain Efficiency | @ 2dB comp. | dB | >56 |

¹ Pout at 1 and 2dB gain compression relative to the maximum gain in the power sweep

² Demonstrator is expected to operate at the P_o average power level

8. Performance Details

8.1 CW signal Power sweeps 380-460MHz

8.1.1 Gain and efficiency (2dB sweep)

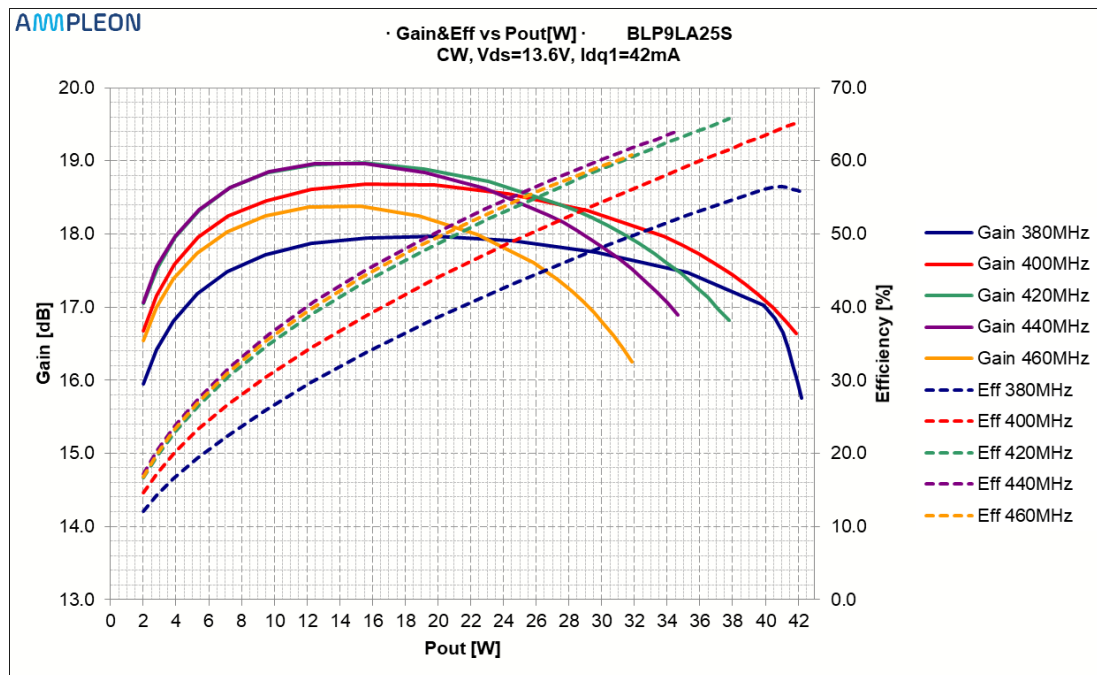

Figure 2 BLP9LA25S_PS_CW_190319_1813_13_6V Gain&Eff vs Pout[W]

8.2 Network Analyzer sweep

Frequency sweep with small signal.

Vgs = 1.8V

Input power = 5dBm (3.2mW)

Figure 3 BLP9LA25S Low signal frequency sweep

8.3 CW Signal performance over 380-460 MHz

8.3.1 1dB compressed power

Figure 4 BLP9LA25S_PS_CW_190319_1813__13_6V Summary: P1dB[W] vs Freq

8.3.2 Gain

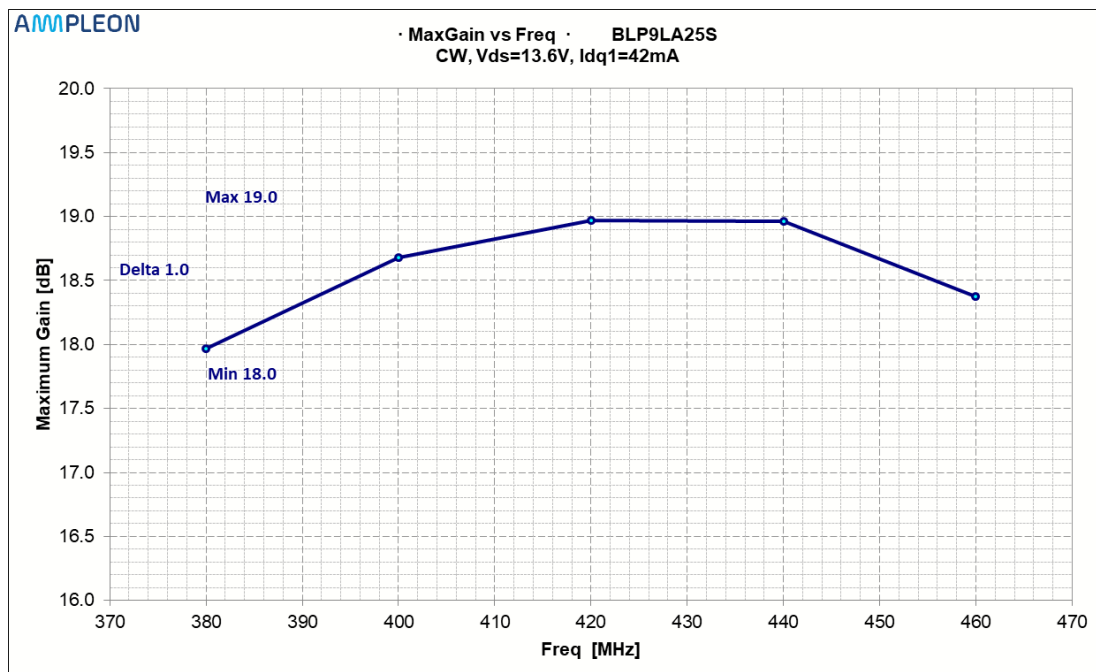

Figure 5 BLP9LA25S_PS_CW_190319_1813__13_6V Summary: MaxGain vs Freq

8.3.3 Efficiency

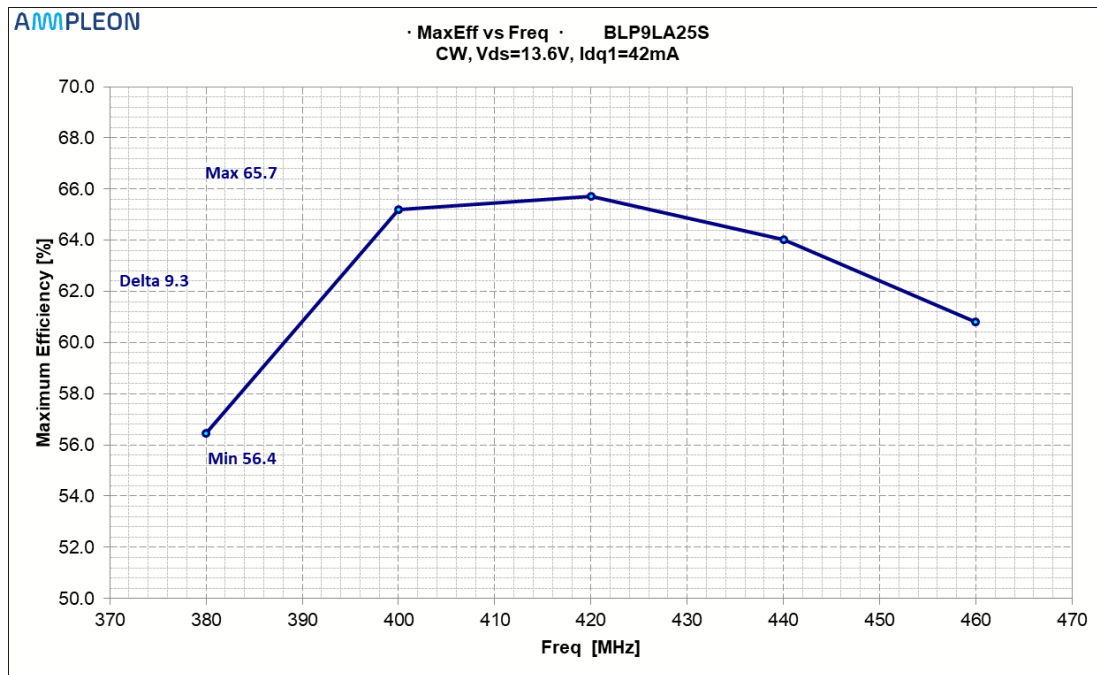

Figure 6 BLP9LA25S_PS_CW_190319_1813_13_6V Summary: MaxEff vs Freq

8.3.4 Return loss

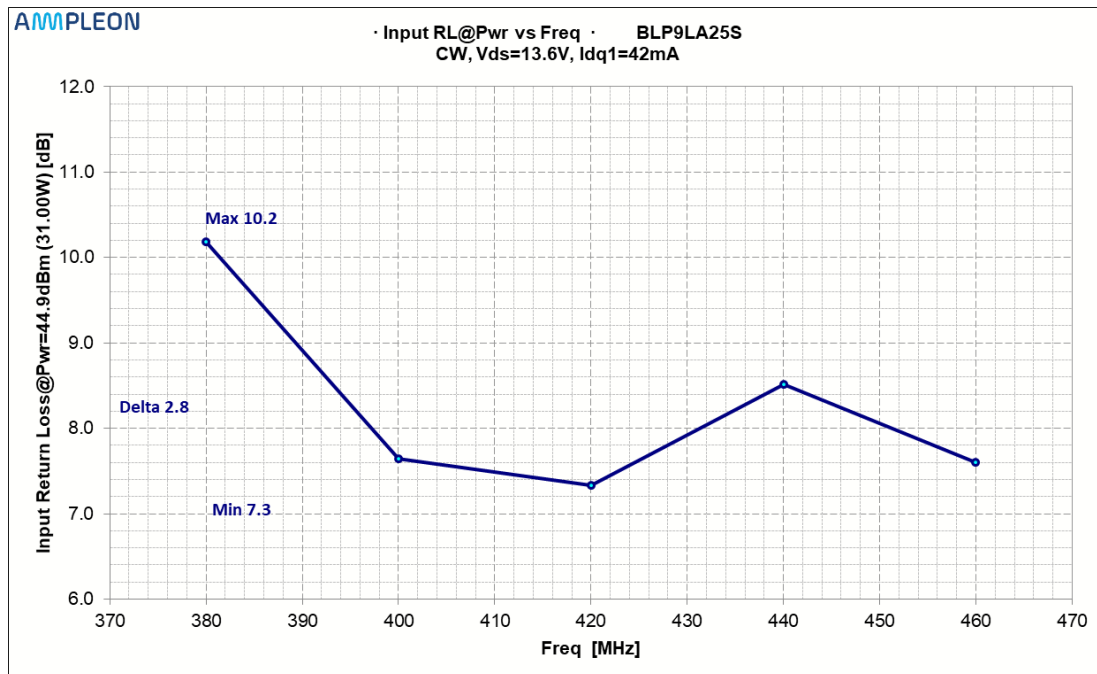

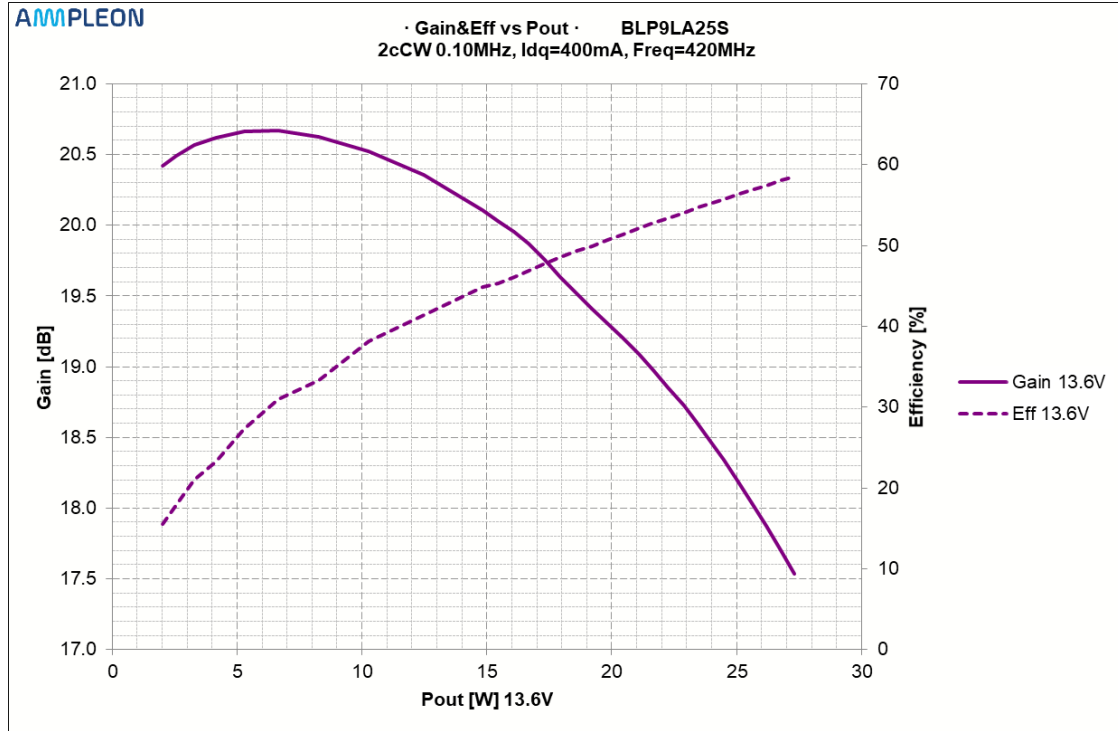

Figure 7 BLP9LA25S_PS_CW_190319_1813_13_6V IRL vs Pout

8.4 Two Carrier signal Intermodulation 420 MHz

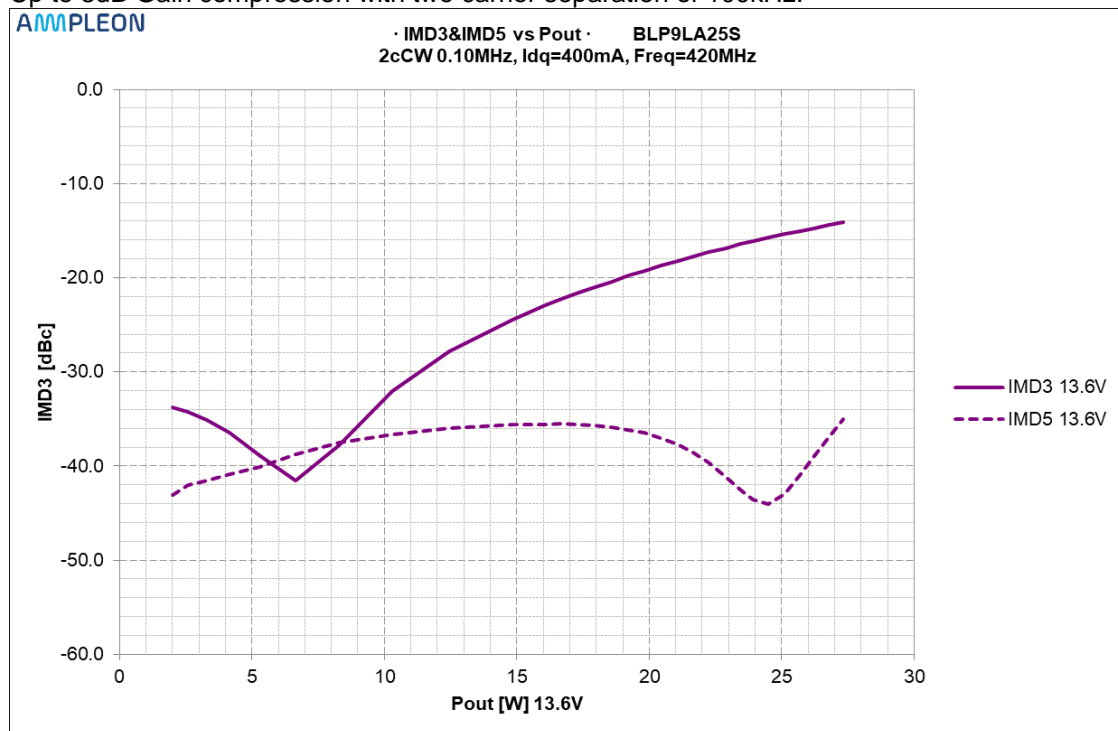

8.4.1 Gain and efficiency power sweep (two carrier)

Up to 3dB Gain compression with two carrier separation of 100kHz.

8.4.2 IMD3 & IMD5 (max)

Up to 3dB Gain compression with two carrier separation of 100kHz.

Applications — Applications that are described herein for any of these products are for illustrative purposes only. Ampleon makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using Ampleon products, and Ampleon accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the Ampleon product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

Ampleon does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using Ampleon products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). Ampleon does not accept any liability in this respect.

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.
